

COMfortel® M-310

Specially designed for the health-care sector, this easy clean handset's membrane keypad is even resistant to disinfectants

- Sturdy, robust housing with stylish design
- Membrane keypad - resistant to disinfectant
- IP 64 classified housing
- Brilliant voice quality
- Large colour display with easy to use menu

Your advantages in detail

The all new COMfortel M-310 DECT handset features a robust, sturdy housing and membrane keypad, which is very easy to clean and resistant to disinfectant, preventing germs from spreading. The IP 64 classified handset is dust-proof and splash-proof, enabling e.g. nursing personnel to accompany patients to the bathroom without having to put down the handset. More-

over, the handset is easy to operate while wearing gloves.

Durability was the key requirement during the development of the COMfortel M-310. Thanks to its shock-proof design, the handset reliably withstands the conditions in a tough working environment – our contribution to sustainability and investment protection.

Features at a glance
