

Weather protection

Perfect protection against weather conditions

- Perfect protection of the door intercom against weather conditions
- High-quality aluminium
- Attractive design

Your advantages in detail

The weather-protection roof for the door intercom systems TFS-Dialog 100 and TFS-Dialog 200 is the perfect weather protection and mounting plate. With this weather-protection roof made of high-quality alu-

minium, your door intercom is protected from the weather conditions and unsightly traces of old installations are optimally covered.
